

RS 310-610/E-/EV MZ Series

Modulating Gas Burners

RS 310/E-/EV MZ	600/1200	-	3900	kW
RS 410/E-/EV MZ	800/2000	-	4900	kW
RS 510/E-/EV MZ	802/2200	-	5250	kW
RS 610/E-/EV MZ	820/2400	-	6300	kW

The RS 310-410-510-610/E-/EV MZ burners series covers a firing range from 1200 to 6250 kW, and it has been designed for use in low or medium temperature hot water boilers, hot air or steam boilers, diathermic oil boilers. It is based on the Digital Burner Management System, Riello REC27-37, which is able to manage the air-fuel ratio by independent servomotors in order to obtain a perfect output control and to assure a correct combustion and safe operation on all modulation range. Operation can be "two stage progressive" or, alternatively, "modulating" with the installation of a PID logic regulator and respective probes.

RS/E-/EV MZ burners series guarantees high efficiency levels in all the various applications, thus reducing fuel consumption and running costs; specific versions are available to operate with Variable Speed Drive technology base on the control of a Frequency Inverter that modifies the air flow through the motor speed variation.

The combustion head engineered with advanced simulation devices, guarantees reduced polluting emissions.

The exclusive design ensures reduced dimensions, simple use and maintenance.

A wide range of accessories guarantees elevated working flexibility.

Technical Data

MODEL		RS 310/E-/EV MZ	RS 410/E-/EV MZ
Burner operation mode		Modulating	
Modulation ratio at max. output		5 ÷ 1	
Servomotor	type	SQM 33 (FS1 - FS2 version)	
Heat output	kW	600/1300÷3900	800/2000 ÷4900
	Mcal/h	516/1118÷3354	688/1720÷4214
Gas pressure at max. output (G20-G25)	mbar	33.2/49.5	41.6/6.2
Working temperature	°C min./max.	0/50	
Fan	type	Forward curve blades	
ELECTRICAL DATA			
Start up	Type	Direct (/E) - Inverter (/EV)	
Electrical supply	Ph/ V/Hz	3N ~ 230 - 400V ±10% 50 Hz

BASIC DESIGNATION

EXTENDED DESIGNATION

GAS TRAINS

The burners are fitted with a butterfly valve to regulate the fuel, controlled by the main management module of burner through a high precision servomotor.

Fuel can be supplied either from the right or left sides, on the basis of the application requirements.

A maximum gas pressure switch stops the burner in case of excess pressure in the fuel line.

The gas train can be selected to best fit system requirements depending on the fuel output and pressure in the supply line.

The gas trains are with or without seal control.

MB "THREADED"

1	Gas input pipework
2	Manual valve
3	Anti-vibration joint
4	Pressure gauge with pushbutton cock
5	Filter
6A	Includes:
	- filter
	- operation valve
	- safety valve
	- pressure adjuster
7	Minimum gas pressure switch
8	Leak detection device, supplied as an accessory or incorporated, based on the gas train code.
9	Gasket, for "flanged" versions only
10	Pressure adjuster
11	Gas adjuster butterfly valve
12	Burner
13	Maximum gas pressure switch
14	Gas train-burner adaptor, supplied separately
P1	Combustion head pressure
P2	Upstream pressure of valves
P3	Upstream pressure of the filter
L	Gas train supplied separately, with the code given in the table.
L1	Installer's responsibility

DMV "FLANGED OR THREADED"

Gas trains are approved by standard EN 676 together with the burner.

The overall dimensions of the gas train depends on how they are constructed. The following table shows the maximum dimensions of the gas trains that can be fitted to RS 310-410-510-610/E-/EV MZ burners, intake and outlet diameters and seal control if fitted.

The maximum gas pressure of gas train "MULTIBLOC" type is 360 mbar, and that one of gas train "COMPOSED" type is 500 mbar.

"MULTIBLOC" guarantees a range of pressure towards the burner from 4 to 60 mbar. For version DN 65 and DN 80 is from 20 to 40 mbar. For version DN 100 is from 40 to 80 mbar. The range of pressure in the "MULTIBLOC" with flange can be modified choosing the stabiliser spring (see gas train accessory).

The maximum gas pressure of gas train "CB" series is 500 mbar. "CB" gas train guarantees a range of pressure towards the burner from 10 to 30 mbar. The range of pressure can be modified choosing the stabilizer spring (see accessories).

The maximum gas pressure of gas train "DMV" series is 500 mbar. "DMV" gas train is supplied without pressure governor.

Example of gas train "MULTIBLOC" type
without seal control (i.e. MBC 1200)

Example of gas train "COMPOSED" type
without seal control (i.e. MBC 1900-3100-5000)

Example of gas train "CB" series
with seal control

Example of gas train "DMV" series
with seal control

Pressure Drop Diagram

The diagrams indicate the minimum pressure drop of the burners with the various gas trains that can be matched with them; at the value of these pressure drop add the combustion chamber pressure. The value thus calculated represents the minimum required input pressure to the gas train.

The minimum input gas pressure required is 15 mbar while burner operating. In particular, the pressure difference between gas train upstream and downstream has to remain always over pressure drop values indicated below.

- ◆ Gas valve leak detection control device (the function of this device is managed by the electronic control box of the burner, through the installation of the pressure switch on the gas train):
- gas train not equipped with pressure switch for leak detection control; this pressure switch can be ordered separately - see PVP KIT column - and installed later.

CQ gas train with pressure switch for leak detection control.

PVP KIT Additional pressure switch for leak detection control.

- Gas train not available or not suitable for the matching to the burner.

Ventilation

The ventilation unit comes with a sound proofing system.

All the burners are fitted with fans, which give excellent performance and are fitted in line with the combustion head. The air flow and sound-deadening materials used in the construction are designed to reduce sound emissions to the minimum and guarantee high levels of performance in terms of output and air pressure.

A high precision servomotor through the main management module installed on each burner, controls the air dampers position constantly.

The RS/EV burners are supplied with the “inverter” technology, which means they are fitted with a device for varying the amount of combustion air through a variable speed action of the fan motor. The burner works at reduced speed, with further benefits in terms of sound emissions, especially during the night when the perception threshold is lower as well decreased power consumption.

New ventilation structure

A new ventilation structure has been developed in order to reduce the overall dimensions and weight

Simplified Maintenance

for motor and fan by direct extraction through opening flange

Air adjusting dampers

at air inlet side with ball bearings

Combustion Head

The combustion head adjustment system allows to adapt internal geometry of the head to the output of the burner. This system guarantees excellent mix on all firing rates range as well as reducing noise and pollutants.

Example of hinged burner opening on the left side of the burner

Example of a RS MZ burner combustion head

SUGGESTED COMBUSTION CHAMBER DIMENSIONS

Example:

Burner thermal output = 6000 kW;

L Combustion Chamber (m) = 4,7 m (medium value);

D Combustion Chamber (m) = 1,2 m (medium value)

Operation

BURNER OPERATION MODE

The RS 310-410-510-610/E-/EV MZ series of burners can have “two-stage progressive” or “modulating” operation.

Power controller

Analog 4-20 mA or 0 - 10V
converter for remote modulation

On “two-stage progressive” operation, the burner gradually adapts the output to the requested level, by varying between two pre-set levels (see picture A).

On “modulating” operation, normally required in steam generators, in superheater boilers or diathermic oil burners, a specific regulator and probes are required. These are supplied as accessories that must be ordered separately. The burner can work for long periods at intermediate output levels (see picture B).

“TWO-STAGE PROGRESSIVE” OPERATION

Picture A

“MODULATING” OPERATION

Picture B

REC27 and REC37 Digital Burner Management System

Combustion systems are in continuous evolution and high tech solutions, in particular connected to electronic systems, are today applied in order to obtain better performances and efficiencies.

The Burner is one of the most important component of the combustion system and its evolution is in the direction of the perfect control of operation and more efficiency.

Following this evolution trend RIELLO RS 310-410-510-610/E-/EV gas burner series has been upgraded with the introduction of new models with modulating operation obtained by Electronic Cam. The new models are based on the Digital Burner Management Systems RIELLO REC27 and REC37, which are able to manage the air-fuel ratio by independent servomotors in order to obtain a perfect output control and to assure a correct combustion and safe operation on all modulation range.

Emissions

The noise emissions have been measured at the maximum output.

RS 610/E-/EV MZ	2040	1180	1125	280

Burner accessories

Accessories for modulating operation

POWER CONTROLLER

To obtain modulating operation, the RS/E-/EV MZ series of burners requires a regulator with three point outlet controls. The following table lists the accessories for modulating operation with their application range.

BURNER	TYPE	CODE
All models	RWF 50.2 - Basic version with 3 position output	20073595
	RWF 55.5 - Complete with RS-485 interface	20074441
	RWF 55.6 - Complete with RS-485/PROFIBUS interface	20074442

PROBE

The relative temperature or pressure probes fitted to the power controller must be chosen on the basis of the application.

BURNER	TYPE	RANGE (°C) (bar)	CODE
All models	Temperature PT 100	-100 ÷ 500°C	3010110
	Pressure 4 ÷ 20 mA	0 ÷ 2,5 bar	3010213
	Pressure 4 ÷ 20 mA	0 ÷ 16 bar	3010214
	Pressure 4 ÷ 20 mA	0 ÷ 16 bar	3090873

CONTINUOUS VENTILATION KIT

If the burner requires continuous ventilation in the stages without flame, a special kit is available as given in the following table:

BURNER	CODE
RS 310-410-510-610/E MZ	20077810

OCI412 INTERFACE KIT

Interface kit between the REC 27.1 and a Modbus system, such as a building automation and control system (BACS). The Modbus interface is based on the RS-485 standard.

BURNER	CODE
RS 310-410-510-610/RS/E-/EV MZ	3010437

SPACER KIT

If burner head penetration into the combustion chamber needs reducing, varying thickness spacers are available, as given in the following table.

BURNER	SPACER THICKNESS S (mm)	CODE
All models	180	20008903

VARIABLE SPEED DRIVE (VSD) FOR RS/EV MZ SERIES ONLY

The motor speed variation for the RS/EV MZ burners series is obtained thanks to a frequency converter: variable speed drive (VSD) provided with a programming panel with start-up assistant.

BURNER	VOLTAGE	MOTOR POWER (kW)	INVERTER POWER (kW)	CODE
RS 310/EV MZ	230V	7.5	7.5	20083590
RS 310/EV MZ	400V	7.5	7.5	20028307
RS 410/EV MZ	230V	9.2	11	20083611
RS 410/EV MZ	400V	9.2	11	3090952
RS 510/EV MZ	400V	12	15	3090960
RS 610/EV MZ	400V	15	15	3090960

The use of inverters other than those indicated by the Manufacturer may lead to burner failure and, in extreme cases, a potential risk of harm to people and damage to property. The manufacturing company shall not be liable for any such damage arising from non-observance of the requirements contained in the burner manual.

UV CELL KIT

A UV cell is available for the supervision of the flame alternatively to ionisation probe for special applications.

BURNER	CODE
All models	20077814

PC INTERFACE KIT

To connect the control panel to a personal computer for the transmission of operation, fault signals and detailed service information, an interface adapter with PC software are available.

BURNER	CODE
All models (*)	3002719

(*) Equipped with RMG/M control box

SOUND PROOFING BOX

If noise emission needs reducing even further, sound-proofing boxes are available. In case of generator heights, where a lower dimension "B" is required, ask for the Box Support Kit code 20065135.

The useful dimensions are 40 mm less than the total dimensions indicated in the table (A, D, E). Not suitable for outdoor use.

BURNER	BOX TYPE	A (mm)	B (mm) min. - max.	C (mm)	D (mm)	E (mm)	[dB(A)] (*)	CODE
All models	C7	1255	160 - 980	110	1140	1345	10	3010376

(*) Average noise reduction according to EN 15036-1 standard

Gas train accessories

ADAPTERS

In certain cases, an adapter must be fitted between the gas train and the burner, when the diameter of the gas train is different from the set diameter of the burner.

Below are given the available adapters; please see on the Gas Train list the correct adapter codes to select.

ADAPTER	DIMENSIONS				ADAPTER CODE
	Ø1 DN	Ø2 DN	A mm	B mm	
1" 1/2  2"	-	-	65	-	20064220
2"  2"	-	-	65	-	20042324
DN 80  2" 1/2  2"	-	-	300	-	3000826
	65	80	400	-	3010221
	80	80	400	-	3010222
	100	80	400	-	3010223
	125	80	320	-	3010224

PVP (PRESSURE VALVE PROVING KIT)*

The seal control function is included on Burner Digital Management System, it is only necessary to add the PVP kit on the gas train.

The leak detection control is compulsory (EN 676) on the burner gas trains with a nominal output more than 1200 kW.

GAS TRAIN	CODE
MB - CB - DMV type	3010344

* not necessary for those models where is included as a standard.

STABILISER SPRING

To vary the pressure range of the gas train stabilisers, accessory springs are available. The following table shows these accessories with their application range. Please refer to the technical manual for the correct choice of spring.

GAS TRAIN	SPRING COLOUR	SPRING PRESSURE RANGE mbar	SPRING CODE
MBC 1900/1 - 3100/1 MBC 5000/1	White	4 - 20	3010381

Specification

DESIGNATION OF SERIES

A specific index guides your choice of burner from the various models available in the RS/E-/EV MZ series. Below is a clear and detailed specification description of the product.

Series:	R	
Fuel:	S	Natural Gas
	L	Light oil
	LS	Light oil/Natural Gas
	N	Heavy oil
Size:		
Setting:	/1	Single stage
	/B	Two stage
	/M	Modulating-Mechanical cam
	/E	Electronic cam
	/P	Proportioning air/gas valve
	/EV	Electronic cam predisposed for variable speed (with inverter)
	/EVi	Electronic cam with integrated inverter
Emission:	... or C01	Class 1 EN267 – EN676
	MZ	Class 2 EN267 – EN676
	BLU	Class 3 EN267 – EN676
	MX	Class 2 EN267
		Class 3 EN676
Head length:	TC	standard head
	TL	extended head
Flame control system:	FS1	Standard/Intermittent (at least 1 stop every 24 h)
	FS2	Continuous (1 stop every 72 h)
Electrical supply to the system:		
	1/230/50	1/230V/50Hz
	3/230/50	3/230V/50Hz
	3/400/50	3N/400V/50Hz
	3/230-400/50	3/230V/50Hz – 3N/400V/50Hz
	3/220/60	3/220V/60Hz
	3/380/60	3N/380V/60Hz
	3/220-380/60	3/220/60Hz – 3N/380V/60Hz
Auxiliary voltage:	230/50-60	230V/50-60H
	110/50-60	110V/50-60Hz

Natural gas, net calorific value: 10 kWh/Nm³ - Density: 0,71 kg/Nm³

The burners of RS/E-/EV MZ series are in according to 2016/426/UE - 2014/30/UE - 2014/35/UE - 2006/42/EC Directives.

(1) Star delta starter.

SPECIFICATION

STATE OF SUPPLY

Monoblock forced draught burners with two stage progressive or modulating operation, with a specific kit, fully automatic, made up of:

- Microprocessor-based Digital Burner Management System (RS/E MZ models)
- Microprocessor-based Digital Burner Management System with Variable Speed Drive technology for the control of a Frequency Inverter (RS/EV MZ models)
- Display Interface operating unit to adjust the system
- Air suction circuit lined with sound-proofing material
- High performance fan with low sound emissions, forward curve blades
- Air damper for air flow setting and butterfly valve for regulating fuel output controlled by independent stepper motor actuators
- Air pressure switch
- Fan starting motor at 2900 rpm, three-phase 230/400 - 400/690 V with neutral, 50 Hz
- Combustion head, that can be set on the basis of required output, fitted with:
 - stainless steel end cone, resistant to corrosion and high temperatures
 - ignition electrodes; ionisation sensor for flame detection (or UV sensor on demand)
 - flame stability disk
- Maximum gas pressure switch, with pressure test point, for halting the burner in the case of over pressure on the fuel supply line
- Star/delta starter for the fan motor (Direct starter fan motor for RS 310-410 models)
- Main electrical supply terminal board
- Burner on/off switch
- Manual or automatic output increase/decrease switch
- Contacts motor and thermal relay with release button
- Burner failure led signal and lighted release button
- Burner opening hinge
- Lifting rings
- IP 54 electric protection level

Standard equipment:

Gasket for gas train adaptor

Adaptor for gas train

Screws for fixing the gas train adaptor: M 16 x 70

Thermal insulation screen

M 18 x 60 screws to secure the burner flange to the boiler

Cable grommets kit for optional electrical wiring input

M16 x 6 studs for fixing the gas elbow to the pipe coupling

M16 nuts to fix the gas elbow to the pipe coupling

Instruction handbook for installation, use and maintenance

Spare parts catalogue

Conforming to:

- 2014/30/UE directive (electromagnetic compatibility)
- 2014/35/UE directive (low voltage)
- 2016/426/UE gas appliances regulation
- 2006/42/EC directive (machine)
- EN 676 (gas burners).

Riello Burners a world of experience in every burner we sell.

[2] HEADQUARTER BURNERS DIVISION
S. PIETRO, LEGNAGO (VERONA) - ITALIA

Across the world, Riello sets the standard in reliable and high efficiency burner technology.

With burner capacity from 5 kW to 48 MW, Riello gas, oil, dual fuel and Low Nox burners deliver unbeatable performance across the full range of residential and commercial heating applications, as well as in industrial processes.

With headquarter in Legnago, Italy, Riello has been manufacturing premium quality burners for over 90 year. The manufacturing plant is equipped with the most innovative systems of assembling lines and modern manufacturing cells for a quick and flexible response to the market.

Besides, the Riello Combustion Research Centre, located in Angiari, Italy, represents one of the most modern facility in Europe and one of the most advanced in the world for the development of the combustion technology.

Today, the company's presence on worldwide markets is distinguished by a well-constructed and efficient sales network, alongside many important Training Centres located in various countries to meet its customers' needs. Riello has 13 operational branches abroad (in Europe, America and Asia), with customers in over 60 countries.
