

## ARRAY 2.5 HIGH EFFICIENCY CONDENSING BOILER

EASE OF  
COMMISSIONING  
& MAINTENANCE

DEDICATED  
BOILER PUMPS

CASCADE UP TO 8 BOILERS  
WITH A TURNDOWN RATIO  
OF 320:1

PERFECT FOR NEW  
INSTALLATION  
AND RETROFIT  
PROJECTS

BUILT IN  
REDUNDANCY

### THE ULTIMATE IN HIGH EFFICIENCY, ABSOLUTE REDUNDANCY & UNQUESTIONABLE RELIABILITY.

The Riello Array is a pre-packaged boiler plant, setting the new benchmark in boiler efficiency, redundancy and reliability, with an output from 800 to 4000 MBTU/hr.

A new model has been introduced to the existing models: Array 800 to complete the range.

Each Array boiler utilizes multiple stainless steel heat exchangers with dedicated pumps, providing up to 40:1 turn down and multiple boiler redundancy in one pre-packaged unit.

A single Array boiler provides superior uptime reliability previously found only in larger multiple boiler systems.
