## **Sylber Launches the LINEA Condensing Wall-Mounted Boiler**

**LECCO, Italy, XX Nov., 2019** — Sylber proudly presents LINEA, a new range of wall-hung condensing boilers featuring Sylber's advanced primary stainless steel exchanger technology. Sylber, a brand of Riello SpA, a leader in products and services for heating, air conditioning and energy efficiency, is part of Carrier, a leading global provider of innovative heating, ventilation and air conditioning (HVAC), refrigeration, fire, security and building automation technologies.

The new range of LINEA condensing boilers was designed to meet all residential comfort needs and includes four models ranging from 25 to 35 kW, with three combined versions and one heating only version. The LINEA boiler is best answer for both new homes and for replacement with high efficiency, low consumption, and low emissions. It's also easy to service and install, making it an ideal residential solution.

The new LINEA heat exchanger is made of stainless steel, with a smooth section tube to offer the best efficiency and cleaning over time. It features AISI 304 L stainless steel that is highly resistant to the corrosion and reduces the internal formation of oxides and other electrochemical phenomena typical of installation on old plants. The single loop wound geometry, or hydraulic circuit in series, offers a constant flow rate in all sections of the exchanger and intrinsically limits clogging. Front access also facilitates periodic maintenance and cleaning of the combustion chamber.

LINEA is equipped with a modern and user-friendly control panel. Simple and intuitive management is possible through a backlit LCD display, which communicates with the user through icons and scrolling texts, allowing easy access to the settings and parameterizations of the boiler and the system.

LINEA has a wide modulation range of up to 1:8 and a modulating low-consumption circulator with Energy Efficiency Index (EEI)  $\leq 0.20$ . LINEA is also C10 approved, including a non-return valve, or clapet, on all models. This makes it ready to install even when collective flues are under pressure making the non-return valve mandatory.

LINEA is a hybrid-ready solution, meaning the boiler uses the new hybrid technology system designed and developed in the Sylber Research Laboratories. This system, created to meet the current and future needs of integration and governance of the various energy sources – gas, electricity and renewables – also includes innovative energy storage and distribution methods.

Finally, LINEA is compatible with all the functions of BeSMART, the Sylber Wi-Fi comfort control that allows users to control and manage home comfort anywhere – even outside the home – through an easy-to-use app.

## Communications / Marketing Approval Template and Checklist

Purpose/Objective: **2019 Sylber new product- LANCIO launch**

Proposed Release/Posting date:

Distribution Channel(s):

Distribute release/article to	Check all that apply
Trade press	✓
Regional/local media	
Newswire service	
Social Media	✓
Marketing material	
BU website posting	✓
CCS website posting	
CCS insight posting	

**BU Approvals** (list names of persons who reviewed/approved the release):

**ADD THE NAME OF THE APPROVER AND DATE APPROVED IN THE SECTION BELOW**

Name	Department	Date approved
Roberto Manzoni	BU Communications lead	04/10/2019
Cosimo Aquaro	Communication Manager	04/10/2019
Raffaele D'Alvise	Marketing Director	04/10/2019
Omar Izzo	Legal	09/10/2019
Francois Audo	CEO – GM	10/10/2019

**WHQ Approvals** (list names of persons who reviewed/approved the release):

**WHQ WILL COMPLETE THIS SECTION**

Name	Department	Date approved
	Required	
Kat Lebo, Danielle Canzanella	WHQ Communications	21/11/2019, 21/11/19
Nicole Sydney	WHQ Product Naming	21/11/2019
Hamza Sultan	WHQ Tax	22/11/2019

### Checklist

*Before submitting items for WHQ review and approval, please be sure:*

- ✓ All trademarked or registered products are noted with the appropriate symbol
- ✓ BIS / BU owns the rights to photo(s) used
- ✓ Customer approval is obtained in writing
- ✓ Appropriate back-up is cited for any company claim
- ✓ Sources are noted in the text for any industry trend or claim

- ✓Engineering / IP / ITC have reviewed any technical paper, new product or claim
- ✓Social media content is included with the release
