Riello Adds Array 800 to Pre-packaged Boiler Plant Series

Array 800 offers the latest in high efficiency, total redundancy and reliability

MISSISSAUGA, Ontario, Jan. 31, 2022 — Riello expands its product portfolio with the addition of its new model Array 800, completing the existing Array boiler series. [Riello](#), a leader in manufacturing systems and technologies for heating, cooling and energy efficiency in the residential and commercial sectors and a worldwide leader in combustion technology, is a part of Carrier Global Corporation (NYSE: CARR), the leading global provider of healthy, safe, sustainable and intelligent building and cold chain solutions.

The Array 800 is a pre-packaged boiler plant, with output from 40 to 800 MBTU/h, with a turn down ratio 20:1. Riello's range of Array boilers, covers an output from 40 MBTU/h up to 4000 MBTU/h.

A single Array boiler provides high uptime and utilizes multiple stainless steel heat exchangers with dedicated pumps. The Array 800 and all models in the series are independent, ensuring continued boiler operation if an adjacent module is turned off or removed. Easy roll-out module configuration allows for easy removal, service and maintenance.

The Array 800, and the full Array range, is equipped with a 7-inch color graphic touchscreen, among the largest in the segment. User-friendly and intuitive navigation

provides quick data collection and diagnostics. The operator interface also includes service reminders for scheduled maintenance. An advanced pre-mixed stainless steel mesh burner with a modulating gas valve, high-performance fan and proportional control guarantees a consistent air to fuel ratio throughout the entire range of modulation resulting in low emissions and efficient combustion. A single platform designed for all Array boilers makes installation and commissioning easy, regardless of the output required.

A new Array model is ideal for new installation and retrofit projects. For more information, visit www.riello.com/north-america/.

About Riello

Founded in 1922, Riello is a leader in manufacturing systems and technologies for heating, cooling and energy efficiency in the residential and commercial sectors and a worldwide leader in combustion technology. Headquartered in Legnago (Verona), Italy, Riello operates in over 120 countries. Riello is a part of Carrier Global Corporation, the leading global provider of healthy, safe, sustainable and intelligent building and cold chain solutions. For more information, visit riello.com.
