

Riello Launches High-End Residential Range with its New RIELLO ELIXA Single-Split Inverter Air-Conditioners

LEGNAGO (Verona), 21 March 2024 — With the new RIELLO ELIXA™ series of single-split inverter air conditioners, Riello is relaunching its high-end offer for the residential market. Designed to offer maximum user comfort and a healthy home environment, RIELLO ELIXA wall-mounted air conditioners achieve energy class A+++ in both cooling and heating thanks to Japanese-quality inverter technology. Riello is part of Carrier Global Corporation (NYSE: CARR), global leader in intelligent climate and energy solutions.

RIELLO ELIXA single-split air conditioners are available in three power sizes (2.5, 3.5, 5.0 kW), while the configuration of the indoor units means they can also work in combination with multi-split outdoor units.

The maximum A+++ energy-efficiency class reduces electricity consumption and helps lower energy bills. RIELLO ELIXA air conditioners offer home occupants the highest level of comfort and clean air. In cooling mode, the innovative COMFORT AIR indirect air distribution system delivers more uniform room temperature, avoids 'air blows' and helps protect skin moisture level.

Thanks to innovative inverter-modulated power technology, the RIELLO ELIXA air conditioner regulates heating and cooling capacity, adapting compressor speed to the demand of residents. This capability minimizes temperature variations and enables overall noise reduction. In addition, special QUIET and SILENCE functions further reduce noise levels both inside and outside the home. The sound level of the outdoor unit with its SILENT function active starts at 38dB(A), comparable to a whisper. In turn, the indoor unit with its QUIET function active emits only 19dB(A), which is akin to human breathing.

The presence of special ultra-purifying blue air filters enhances air quality by removing up to 94% of the fine dust (PM 2.5) that air pollution generates. In addition, the special surface treatment of the RIELLO ELIXA's aluminium heat exchanger ensures that dust and impurities drain and slide downwards with the condensation water.

The style of the RIELLO ELIXA indoor units is simple, essential and clean, featuring a combination of rounded lines on the front and squared lines on the back. The result is a technological solution that provides a discreet and elegant furnishing that can adapt to any type of indoor environment. The surface finish is glossy and scratch-resistant, while the remote control matches the style of the indoor unit.

"Energy efficiency, design and comfort at the highest level are the distinguishing features of these products, which Riello installers will be able to offer as high-end solutions for the residential market," said Marta Bernasconi, Product Manager Air Conditioning Products, Carrier Global Comfort Solutions Europe, Riello. "This advanced and proprietary technology from Carrier allows us to provide a product line with market-leading features."

LEDs on the indoor unit allow immediate verification of the active operating modes. Furthermore, the remote control provides home occupants with a simple and intuitive system for adjusting the climate thanks to pre-set functions, a backlit display, and three main fluorescent buttons that are always visible, even in the dark.

All RIELLO ELIXA indoor units come as standard with an integrated and completely invisible Wi-Fi module. To adjust air conditioning within the home at any time, even from outside, residents can use the

intuitive and proprietary 'Hi, Comfort AC' App, which is available for download from app stores. The 'Hi, Comfort AC' App not only provides full access to all comfort programming functions, it also allows for energy monitoring. For more information, please visit www.riello.com

About Riello

Founded in 1922, Riello is a leading brand in manufacturing systems and technologies for heating, cooling and energy efficiency in the residential and commercial sectors and a world-wide leader in combustion technology. Headquartered in Legnago (Verona), Italy, Riello operates in over 120 countries. Riello is a part of Carrier Global Corporation, global leader in intelligent climate and energy solutions that matter for people and our planet for generations to come.
