Vokèra by Riello Supports Community Heating Project with Product Donation and Hands-on Experience for Apprentices

LONDON COLNEY, England, Month XX, Year — [Vokèra](#) by Riello donated one of its technologically advanced combi boilers for a local Scout Group building project in Scotland. The high-efficiency Vokèra evolve 36C (36kW) gas condensing combi will be installed by East Ayrshire Council's heating and plumbing apprentices, giving them valuable hands-on experience under professional supervision, all while assisting a worthwhile community programme. Vokèra will also provide commissioning support to the apprentices and on-site training by one of its highly-qualified technical teams. Vokèra, through its parent company Riello Group, is a part of Carrier, a leading global provider of innovative heating, ventilating and air conditioning (HVAC), refrigeration, fire, security and building automation technologies.

“Vokèra is one of our most valued and trusted partners when it comes to providing reliable new and replacement boilers for our social housing tenants,” said Barrie Mclatchie, project officer for East Ayrshire Council. “We install around 850 of their appliances every year and their support and training are always excellent. We believe

their efforts will have lasting community benefits and ensure the viability of a building that combines warmth and efficiency for this important local youth facility.”

According to Apprenticeship Statistics for England* there were 23,000 apprentices in the Construction, Planning and Built Environment sector in 2017/18. The Scout Hall project reflects Vokèra’s commitment to supporting local community initiatives and helping to create the next generation of highly skilled heating engineers by offering professional training and support.

“In addition to training for individual installers, we also assist colleges, councils and housing associations with high-quality training for their students and staff,” said Neil Mattock, marketing director for Vokèra. “We have established more than a dozen affiliations with education facilities that offer plumbing and heating courses, providing them equipment and other resources for their training departments. And this support has now been extended to allow other colleges to send their students for courses at our well-equipped training centres.”

The Vokèra evolve 36C gas condensing combi boiler will be at the heart of a complete new heating system for the Scout Hall and will be connected to approximately 10 radiators. Offering warmth, comfort, energy efficiency and superb performance, the evolve 36C is ideally suited to meet the building’s heating and hot water demands.

For more information on the range as well as news and updates, visit www.vokera.co.uk or follow Vokèra on [Facebook](#), [Twitter](#) and [LinkedIn](#).
